Location: Wittevrouwensingel, Utrecht
Client: Private
Description: 3 apartments in a listed building

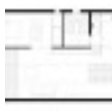

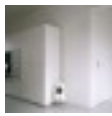

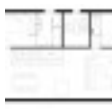

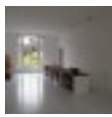

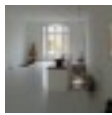

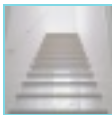

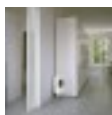

The 'Wittevrouwensingel' is a part of the ancient ring road around the old town of Utrecht. We provided a base by creating a silent image. The absence of annoying details like radiators and the addition of large definable elements offer the possibility for a very personal layer for the user. The camel on the second floor is a user's addition. We think this should be possible.

The natural light, reflections, materials (concrete, wood and plaster) and the proportion add up to the total image. Taking a piece of the roof surface and placing a row of doors created the balcony. The ground plan of all 3 apartments is based on a large 'closet' that contains toilets, shower / bath, entrance and storage.
